Pressure Wash Melton, VIC

Located in Melton, Victoria, we provide an extensive range of pressure washing services. Our trained and professional staff are here to cater to all of your residential and commercial building cleaning needs. No job is considered too big or too small! Whether you're looking to sell, are after an effective and affordable way to rejuvenate your home or building exterior, or want to get rid of unsightly stains and build-up, Melton Pressure Cleaning is at your service.

Most properties will, at some stage or another, need some form of external cleaning and restoration. Over time, unsightly stains, mould, and mineral deposits can build up on exterior surfaces resulting in a stained, tarnished and aged appearance. Pressure washing will help restore a home or commercial building and its surroundings, immediately rejuvenating and transforming the appearance of aged and tarnished surfaces, as well as providing protection against potential future damage from debris and build-up.

Why Melton Pressure Cleaning?

With extremely stubborn external stains and build-up, regular cleaners often just won't cut it. Even the strongest and most powerful detergents, commercial cleaners and chemicals may not be enough to penetrate and lift the stain at hand. Our powerful pressure cleaning, power washing and steam pressure cleaning techniques will quickly and effectively remove what standard cleaners and detergents won't. The pressurised water in a high-pressure washer system is powerful enough to blast stubborn, unsightly stains and build-up right off the surface. With pressure washing, the need for harsh chemicals is reduced as high-pressure washing relies on pressurised water for the cleaning process. For the removal of adamant stains such as mineral and lime deposits on bricks and concrete, an acid wash may be used in conjunction with the pressure washer. The combination of pressurised water and acid wash makes for a highly effective brick cleaner and concrete cleaner.

At Melton Pressure Cleaning, we use only the latest tools and equipment, such as the Kärcher pressure washer and Ryobi pressure washer. The water

At Melton Pressure Cleaning, we use only the latest tools and equipment, such as the Karcher pressure washer and Ryobi pressure washer. The water pressure is adjusted according to the level of grime and build-up on the surface being cleaned. Importantly, we ensure that our equipment does not leave any marks or scratches on your newly cleaned surfaces. Our work is of the highest quality, and we pride ourselves on delivering a fast, efficient and cost-effective service, regardless of the size of the project. Our professional staff will leave your home or commercial building looking as good as new. And, once we're done, we'll clean any mess that was incurred during the job. With our staff, you'll never find yourself in the position of cleaning, tidying or picking up the pieces. Instead, we'll arrive on time, do the job on time, and leave on time, leaving nothing but professional cleanliness in our wake.

At Melton Pressure Cleaning, we understand how important it is to feel confident in your choice of residential and commercial pressure cleaning specialists. We are here to assist.

Our Pressure Washer Services

Please visit our Services page to view a complete and detailed listing of the pressure washing services we provide. As well as servicing residential and commercial buildings, we provide pressure washing to sporting and tennis court facilities. Whether you have a small house, large house or commercial warehouse, whether you're sprucing your property for sale, giving it a much-needed face-lift or some long-overdue maintenance, our professional team are here to assist. Here is a snapshot of our services. Visit our services pages, or contact us for further detailed information on what we can do for your property.

Roof Cleaning

There are many important reasons to maintain a clean roof. Besides the aesthetic appeal, regular roof cleaning helps to protect your roof from the damage that can occur over time due to debris and build-up. The easiest and most effective way to clean your roof is with pressure cleaning. There are many advantages to pressure cleaning your roof. This cleaning method will help restore the roof and immediately transform the appearance of tarnished and aged roof tiles.

Over time, mould, algae and lichen can attach themselves to roof tiles, causing discolouration and gradual deterioration. As well as being visually unappealing and potentially harmful to roof tiles, these nasties are also a potential health hazard. Pressure cleaning will quickly and effectively blast away these nasties, along with bird droppings, twigs and other build-ups, not only cleaning but prolonging the life of your roof. In addition to this, the pressurised spraying will help clear and protect gutters by removing debris that may eventually clog them.

Regular roof cleaning is an excellent investment to help maintain the external appearance of your roof and protect it from damage. Contact Melton Pressure Cleaning today. Our team will cater to all of your roof cleaning and roof tile cleaning needs.

Window Cleaning

Windows can very quickly become covered in dirt and grime due to pollution in the air. Combine this dirt and grime with algae and mildew, and before long, crystal clear glass becomes dull, grimy, unsightly glass. Pressure washing is a highly effective way to clean built-up grime, algae and mildew on

windows. However, there is the potential for shattered glass and mess if the process is not carried out correctly! For this reason, it is advisable to engage only trained and skilled professionals for your window cleaning needs.

Melton Pressure Cleaning is your window cleaning expert – we use only the recommended tools and equipment. In addition, our staff are fully trained on using the equipment correctly on your potentially fragile and delicate window areas. We'll get into any hard-to-reach surfaces and thoroughly clean all of your window surfaces. Then, we'll leave your windows clean, dry and streak-free, giving your home or building a fresh and clean feel. You may be left amazed at the amount of new light flowing through!

Regular window clean is a must to help maintain a clean, fresh look, along with an inviting and welcoming feel to your home or commercial building. Contact Melton Pressure Cleaning today for all of your window cleaning needs.

Pool Cleaning

It goes without saying that backyard pools need regular maintenance. Regular cleaning will keep your pool looking good and ensure that it is always safe and ready for use. Pressure cleaning will help keep your pool clean and sanitised by removing dirt and build-up from both in and around the pool area. In addition, it will blast potentially harmful impurities from the inside and outer edges of your pool, keeping it clean, safe and ready to use.

Even in chlorinated water, grime and impurities can and will build up on the surfaces of your pool as well as the build-up that comes from surrounding trees – such as leaves and insects – the walls of the pool will also likely be comprised of build-up from algae, fungi, mould, limestone and bird droppings. Naturally, nobody wants to dive into a pool filled with such nasties! Pressure cleaning is the answer to your pool cleaning needs. A pressure wash will not only save you many hours of effort, but it will also give you a detailed and thorough clean that cannot be found with regular washing and scrubbing. You may wish to consider regular pressure washes during the swimming season.

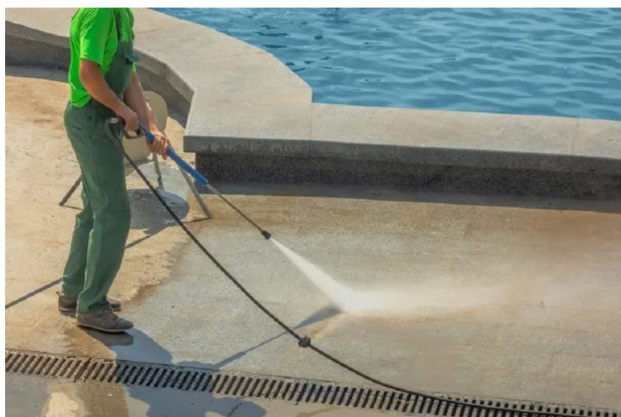

Is your pool in need of some TLC? Contact Melton Pressure Cleaning today to learn more on how we can help keep your pool clean, safe and ready for use.

General Pressure Cleaning

We offer a wide range of general pressure cleaning services at competitive prices. Our pressure cleaning services provide you with an effective and affordable way to meet your residential or commercial building cleaning needs. Our pressure cleaning techniques will remove stains and build-up on a wide range of exterior surfaces without the need for excessive detergent and chemical use – helping the environment AND saving you precious hours of manual scrubbing, washing, wiping down and hosing!

Pressure cleaning will help rejuvenate and restore your home or commercial building and its surrounds, immediately transforming the appearance of grimy, tarnished and aged exterior surfaces. Melton Pressure Cleaning is your specialist in concrete cleaning, driveway cleaning, tile cleaning, brick cleaning, paver cleaning, pavement cleaning, car park cleaning, warehouse cleaning and washdown for building repainting. As well as general stubborn stain removal, we are your experts in mould and moss removal, rust removal, paint and graffiti removal, gum removal, grease and oil removal, and mineral and lime deposit removal.

Removal of unsightly stains and build-up will not only improve the aesthetics of your property; it can also prevent the need for future building repairs. Need more information, or not sure of your pressure clean requirements? Speak to one of Melton Pressure Cleaning's expert staff to discuss your individual needs.
